# CF Function 'O Day

Featuring:  
`QueryExecute()`

with William Frankhouser

## QueryExecute(sql [, params, options])

- One Required param
  - 'sql' string to execute
- Two Optional
  - 'params' values – maxlength, null, cfsqltype, value, etc.
    - ? for array values or :name for struct values
  - 'options' for Query - same attributes in cfquery datasource, dbtype
- Function introduced in [ColdFusion 11](#) and [Lucee 4.5](#)
  - Lucee includes 'name' attribute
- [Example of QueryExecute\(\)](#)
- In ColdFusion 2021, returnType allows now Array, Struct, JSON/Array, JSON/struct and Query(Default)

# How UnionBay is Using ColdFusion – Part II

Presenter: Eugene Pipko – IT Manager – UnionBay

# Questions/Answers/ Help Needed

This is your opportunity to ask any ColdFusion question or request help for a ColdFusion-related issue.

# Next Meeting

**June 21, 2023 – 5:00 PM PDT (online via Zoom).**

- Tag or function O' the day – Will Frankhouser
- How to gracefully handle errors in your application – Leon O'Daniel and Will Frankhouser
